

Sunless Glow Tanning Lotion Application Directions

L'BRI Sunless Glow Tanning Lotion is the healthy way to a gorgeous, glowing tan.

Read the instructions completely before application for optimum results.

Due to the drying time required, we recommend applying before bedtime. This allows the tanning ingredients to react to the amino acids in your skin while you sleep.

Preparation

For even coverage, and a longer lasting and smoother tan, shave then exfoliate with Exfoliating Face and Body Scrub. If applying after bathing, allow skin to dry completely. Massage a small amount of Daily Moisturizing Hand and Body Lotion into knees, elbows, feet or any areas of severely dry skin. This will prevent these areas from 'grabbing' too much color and creating dark areas on the skin.

Application

Apply Sunless Glow with latex-free or vinyl gloves to prevent your palms from absorbing color. Begin with the legs, applying downward from the groin to the top of the foot.

Massage a generous amount into skin in a circular motion. Continue to apply to all exposed skin surfaces. Apply lightly to the underarms, wiping with a damp cloth after five minutes.

Do not apply directly to the toes, heels or sides of the feet. Use sparingly on knees, ankles, elbows, face and neck to avoid darker areas of skin.

Tip: Don't forget to apply behind the ears and the back of your neck!

Following application

We recommend waiting 30 minutes before dressing to allow the product time to penetrate the skin. For a streak-free tan, avoid swimming, bathing or perspiring for 8 hours following application. A small amount of the color may transfer to clothing, but is easily removed with laundering.

Maintenance

Apply Sunless Glow every day as directed until desired color density is reached. Exfoliation is recommended every two to three days. Moisturize daily to seal in and prolong your beautiful, natural-looking tan.
